

X1 PRO (AR500)

**Moving Target For LEOs, MIL
& Advanced Firearms Training**

\$2,449.00

- ✓ Veteran-Owned
- ✓ Warranty-Backed
- ✓ Satisfaction Guaranteed

For Law Enforcement and Professionals

In Popow v. City of Margate (1979), the courts made a powerful ruling: officers must train for the conditions they'll face in the real world. Static targets on a 25-yard range just don't cut it. When duty calls and lives are on the line, officers need training that prepares them for the unpredictable.

With a weight capacity of 20 lbs, support for steel targets, and AR500 armor, this system allows for dynamic target movement in any training environment. Set it up in minutes and turn any range or shoot house into a fully functional training facility.

Train for Real-life Scenarios with Features Like:

- Moving Target Mode to simulate realistic threats.
- Random Distance Mode for unpredictable scenarios.
- Record and Playback Movement repeat programmed sessions for different shooters.
- Steel Target Compatibility supports up to 20 lbs, including 1/3 IPSC silhouette steel targets.
- AR500 Armor Plate 10mm thick (0.39 inches) for superior durability under sustained fire.

Investing in dynamic, steel-compatible target systems safeguards lives, sharpens reflexes, and eliminates outdated training limitations.

- 2x 800lb. Hand winch
- 4x Li-ion battery
- 2x Charger
- Comprehensive instruction manual
- All necessary hardware for assembly

FAQs

How long is shipping and delivery?

We process and ship orders in 1-2 business days. Shipping then takes about 7-9 business days once the system leaves our shop.

Do you accept purchase orders from police departments?

Yes, email us at info@dynamicrangex1.com for an official quote.

What's the difference between the X1 Plus and the X1 Pro (AR500)?

The X1 Pro (AR500) is our most advanced model yet. It can do everything the X1 Plus does but with improved durability and target capacity.

With its AR500 shield and ability to carry steel targets (up to 20 lbs), it's by far the toughest and most portable target system of its kind.

We recommend both to law enforcement officers and trainers, but if you have rigorous training needs, or a lot of rookies under your wing - the X1 Pro (AR500) is the better investment.

What is the difference between the single unit and the X1 Pro (AR500) police department bundle?

The bundle comes with two X1 Pro (AR500) kits and two extra batteries, priced at a 10% discount, saving your department \$489.80!

Train Anytime, Anywhere.
